A feeling of freedom

DESCRIPTION

Inside Skin is the ideal fabric for underwear products, ensuring excellent comfort at skin contact and adapting perfectly to the body's shape. Thanks to its hydrophobic properties, it doesn't absorb water and can dry quickly, avoiding unpleasant odors.

The Soft Hand Touch ensures a pleasant and comfortable contact with the body, without risking skin irritations. The extended use doesn't create pilling problems, since it retains the quality without turning into an unsightly and ruined fabric.

The fabric's stretch qualities make Inside Skin extremely comfortable and it can be easily customized by dyeing the fabric any colors or applying sublimation printing.

Inside Skin can be washed at a low temperature ensuring very good cleaning results.
